

Sarah E. Marzen

CONTACT INFORMATION	W. M. Keck Science Department Pitzer, Scripps, and Claremont McKenna Claremont, CA 91711 USA	<i>Voice:</i> (202) 445-3243 <i>E-mail:</i> smarzen@kecksci.claremont.edu <i>WWW:</i> sarahmarzen.com
RESEARCH INTERESTS	Sensory prediction, reinforcement learning, the intersection of information theory and biology	
EDUCATION	University of California, Berkeley , Berkeley, CA, USA Ph.D., Physics, September 2011 - May 2016 <ul style="list-style-type: none">• Dissertation Topic: “Bio-inspired problems in rate-distortion theory”• Advisor: Michael R. DeWeese Summer schools American Physical Society New Faculty Workshop, 2022 Machine Learning Summer School, 2013 Santa Fe Institute Complex Systems School, 2014 California Institute of Technology , Pasadena, CA, USA B.S., Physics, September 2007 - May 2011	
FUNDING	PI, Keck DEI Mini-Grant Amount: \$2,000 Period of Performance: Feb 2023-Dec 2023 PI, National Science Foundation, Santa Fe Institute, and the W. M. Keck Science Department Workshop: Sensory Prediction, Engineered and Evolved Amount: ~ \$75,000 Workshop Date: July 10-14, 2023 PI, OCAC Data Science Development Grant Amount: \$1,500 Period of Performance: 2021-present Co-PI, Templeton Foundation Project: Grokking the Voices of the Deep—Detecting Bioacoustic Signatures of Cetacean Intelligence through Semantic Information Theory Amount: ~ \$250,000 Period of Performance: 09/01/2021-08/31/2023 PI, Air Force Office of Scientific Research , Computational and Cognitive Sciences Project: “Minimal Models of Sensory Prediction” Amount: ~ \$600,000 Period of Performance: 08/2019-08/2022	
PROFESSIONAL AFFILIATIONS	Society for Industrial and Applied Mathematics, American Physical Society, Sigma Xi	
ACADEMIC EXPERIENCE	Assistant Professor of Physics , W. M. Keck Science Department, Claremont, CA August 2019 - present	

Postdoctoral Fellow, MIT, Cambridge, MA
Collaborated with Professor Nikta Fakhri and Professor Jeremy England 2016 - August 2019

Seminar XL/LE Facilitator, MIT, Cambridge, MA
February 2018 - May 2018, October 2018 - present

Graduate Researcher, U.C. Berkeley, Berkeley, CA
Advised by Professor Michael R. DeWeese 2011 - 2016

Teaching Assistant for Professor James Crutchfield, U. C. Davis, Davis, CA
Natural Computation and Self-Organization, a graduate-level course with ~ 30 students Fall 2015

Teaching Assistant for Professor Rob Phillips, Caltech, Pasadena, CA

Physical Biology of the Cell (APh161), graduate-level course with ~ 30 students Winter 2010
Freshman biology laboratory (Bi1x), with ~ 20 students Spring 2010

Research Assistant to Professor Rob Phillips, Caltech, Pasadena, CA

Studied cooperativity in ligand-receptor binding models as Class of '52 SURF Fellow Summer 2010

Studied information-theoretic non-equilibrium statistical mechanical models as Amgen Scholar
Summer 2009

Research Assistant to Professor Tom Tombrello, Caltech, Pasadena, CA
Studied simulation and fabrication of nanolasers as Physics 11 Research Fellow Summer 2008

Research Assistant to Dr. James Ellenbogen, MITRE Corporation, McLean, VA
Intern in MITRE Nanosystems Student Program Summers 2004-2007

HONORS, AWARDS AND SERVICE **Service to Claremont Colleges** 2021-

DEI Committee
Executive Committee
Data Science Curriculum Coherence Committee
Data Science Hub Blogger
Scripps Post-Bac Interview Committee
W. M. Keck Seminar Series Committee
Scripps Student Funding Opportunities Committee
Scripps Advisor
Professional Development Network Committee on AI Ethics

Guest Editor

Computational Brain and Behavior Special Issue on "Sensory Prediction: Engineered and Evolved"
2023-

Entropy Special Issue on "The Role of Information in Cultural Evolution" 2022-

Open Mind Special Issue on "Information-Theoretic Principles in Cognitive Systems" 2023-

NeurIPS Workshop co-organizer, Information-Theoretic Principles in Cognitive Systems 2022

Scialog Research Fellow, Molecular Basis of Cognition 2022

Mary W. Johnson Faculty Scholarship Award 2022

American Physical Society Division of Biological Sciences Executive Committee , Early Career Member and Newsletter Editor	2022
Aspen Workshop co-organizer , Learning Dynamical Models from Biophysical Data	2022
Google Summer of Code Mentor with Christopher Hillar to Shiven Tripathi	2021
Entropy Topic Advisory Board Organizes and Guest Edits Special Issues for Entropy	2021
MIT Kauffman Teaching Certificate Program	2018
MIT Physics of Living Systems Fellowship	2016
Fellowship from Ling-Lie Chau Excellence Award at U.C. Berkeley	2015
Reviewer for fQXi, Princeton Press, MIT Press, Alfred P. Sloan Foundation, Physical Review X, European Journal of Physics Plus, Biophysical Journal, Physical Review B, PLoS Computational Biology, Physical Review Research, Nature Physics, Frontiers in Computational Neuroscience, New Journal of Physics, Science Advances, Journal of Theoretical Biology, Advances in Complex Systems, Entropy, Bulletin of Mathematical Biology, and Physics Letters A	2014 -
National Science Foundation Graduate Research Fellowship in Biophysics	2011
U.C. Berkeley Chancellor's Fellowship	2011
Haren Lee Fisher Memorial Award Awarded to one junior at Caltech per year for excellence in physics	2010
Caltech Admissions Committee member and blogger	2010
Physics 11 Research Fellowship Freshman-only research fellowship awarded to top six freshman applicants	2008
John Stauffer Merit Award One of ~ 50 Caltech students to receive a merit award	2008
Caltech Tech News and Copy Editor	2008-2011
Caltech Axline Award Merit scholarship that provides free tuition, room, and board	2007-2011
Intel Science Talent Search Finalist Hydrophobic hydration model chosen as one of the top 40 science fair projects in the United States	2007
U.S. Physics Team finalist Chosen as one of 24 students in United States to train for International Physics Olympiad	2005, 2007

BOOK CHAPTERS

C. J. Hillar and **S. E. Marzen**. “Neural network coding of natural images with applications to pure mathematics,” Proceedings of the AMS Special Session on Algebraic and Geometric Methods in Discrete Mathematics, edited by: Heather Harrington, Mohamed Omar, and Matthew Wright (2017).

CONFERENCES

PROCEEDINGS

R. Tikhonov, **S. Marzen**, and S. Dedeo. “How Predictive Minds Explain and Control Dynamical Systems”, in publication by NeurIPS Workshop on Information-Theoretic Principles in Cognitive Systems (2022).

CONTRIBUTED TALKS

J. Soriano* and **S. Marzen**. “The information acquired by evolution”, American Physical Society March Meeting, March 2023.

S. Marzen and J. P. Crutchfield. “Predictive feature extraction by conditionally Markovian channels in memoryful, fluctuating environments”, Information Engines Workshop, October 2018.

S. Marzen and J. P. Crutchfield. “Optimized bacteria are environmental prediction engines”, Society of Industrial and Applied Mathematics, August 2018.

S. Marzen and J. P. Crutchfield. “Optimized bacteria are environmental prediction engines”, Telluride Information Engines Workshop, July 2018.

S. Marzen and S. DeDeo. “Evolution of lossy compression”, Society of Industrial and Applied Mathematics, July 2016.

S. Marzen and S. DeDeo. “Evolution of lossy compression”, American Physical Society, March

2016.

S. Marzen. “New tools for dimensionality reduction in prediction”, Conference on Complex Systems Satellite Session, October 2015.

R. Mehta, **S. Marzen**, and C. Hillar. “Exploring discrete approaches to lossy compression of natural image patches”, 2015 European Signal Processing Conference.

S. E. Marzen, J. Zylberberg, and M. R. DeWeese. “How efficient coding of binocular disparity statistics in the primary visual cortex influences eye rotation strategy”, BMC Neurosci. 2013; 14(Suppl1): O7. (talk) Recipient of travel grant from Organization of Computational Neuroscience.

INVITED TALKS

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” Organization of Computational Neuroscience Workshop on Information Theory (2023)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” Santa Fe Institute Workshop on Sensory Prediction, Engineered and Evolved (2023)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” American Mathematical Society, Sectional Meeting (2023)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” American Physical Society March Meeting (2023)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” CSU Long Beach Physics Seminar Series (2022)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” UCSB Biology Seminar Series (2022)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” UCSD Institute of Neural Computation Seminar Series (2022)

S. Marzen. “How well do neurons, humans, and artificial neural networks predict?” MITRE Tech Talk, McLean campus (2022)

S. Marzen. “Information theory in biology”, Redwood Neuroscience Seminar Series 2018.

S. Marzen. “Prediction and dissipation: faster calculations, bounds, and optimized sensors”, BIRS (2022)

S. Marzen. “Optimal sensors in random environments”, Flatiron Research Institute (2022)

S. Marzen. “Everything’s a reservoir: Using the back of the brain to improve machine learning prediction algorithms”, FlatIron Research Institute (2021)

S. Marzen. “Everything’s a reservoir: Using the back of the brain to improve machine learning prediction algorithms”, Emory Physics Colloquium (2021)

S. Marzen. “Using lossy representations to understand the neural code?”, Organization of Computational Neuroscience Workshop on Information Theory (2020)

S. Marzen. “New methods for continuous-time, discrete-event prediction”, Workshop on Agency at the Interface of Quantum and Complexity Science (2020)

S. Marzen. “How can we predict efficiently?”, Okinawa Institute of Science and Technology Seminar Series 2020.

S. Marzen. “How can we predict efficiently?”, USC Physics Colloquium 2019.

S. Marzen. “How can we predict efficiently?”, Harvey Mudd Physics Colloquium 2019.

S. Marzen. “Bio-inspired problems in rate-distortion theory”, USC Information Sciences Institute 2019.

S. Marzen. “Bio-inspired problems in rate-distortion theory”, IEEE International Symposium on Information Theory 2019.
